Sealed proposals will be received at the City
Clerk's office, addressed to the committee on
streets, until Saturday, the lith inst., for building
an approach across the cross levee where it intersected by the extension of Sycamore street.
This work will require the moving of about 1,000
cubic yards of eith, and the material can be obtain
ed in a convenient location near at hand, outsids
of said levee. Similar proposals will also be received in the same way for widening the road
thrown ap on Wastington avenue, extended immodiately south of the cross levee, and filling
the approach to the levee on same avenue, immediately north of said levee. This work will require the removal of about 450 cubic yards of
earth, which can be procured in a convenient location outside of the levee.

Proposals will also be received to widen the
road now throws up on Washington avenue between 30th and 32nd streets. This work will require the removal of about 250 cube yards of
earth, which can be procured in the context of the levees.

Yesterday after dinner while a load of lumber was being taken from the mill to the Itlinois Central for shipment, a little son of Mr. Hughes, aged six years, was riding on the wagon. The little fellow in climbing about over the lumber fell off, and in falling, got his right head caught either in the timber, some of which was very heavy, or some where in the machinery of the wagon, by which it was crushed so severely that it was thought the two middle fingers would have to be amputated. The child was taken home, where he soon recovered from his fright, and it was thought ant beyond the loss of two fingers, he has sustained no other injury. Toward eming, however, the little fellow showed symptoms of growing worse. After eight o'clock he did not speak, and died between twelve and one o'clock. It is supposed that he sustained internal injuries, which, at first were not noticeable.

Office of the Ballard Tobacco Warehouse, Cairo, Illinois, April 1st, 1872, We have not deemed it necessary to place in the hands of the planter our anabout noon; and now we hear of the death | nual tobacco circular letter at an earlier date than the present, from the fact that the season has been, thus far, unpropitious; We might say with truth, that we have had no "season" at all in '72, and the indications are that very little tobacco will

move before the fifteenth of the present

The planter has his hands full just now in preparing his present crop for market and preparing his ground for the coming crop. Throughout the entire west extraordinary efforts are being made to plant a large crop, and if the multitude of vicisitudes to which the plant is liable before it matures passes harmlessly by, we may reasonably expect an unprecedentedly large yield. This will have no material effect on the prices, as the market throughout Europe and this country will close with bare boards, and next year there will be an active demand for all that is offered.

season than last year, and, although the sales were regular and well attended, we have not received as many hogsheads as we did the same date last year, for the reason given above. We have, however, purchased a very large quantity from the planter, delivered at the warehouse in bulk, and this we shall continue to do, as planters. They are thereby enable to realize on every pound of their crop at almost any time, and without the vexatious delays of securing an advance and placing themselves in the power of the party making the advance.

Prices for low grades and shipping leaf day; and "you know villains don't come have steadily advanced throughout the pants maker. Good wages, inquire at season, and we see no cause, at this time | No. 16, Ohio levee, Cairo, Illinois, from our standpoint, for any decline; and when we consider that the manufactories throughout the entire country are nearly all at a stand-still, awaiting the result of an anticipated change in the revenue laws, the stock of manufactured tobacco growing less in consequence, the over-estimate of the crop of '70, the well-known short crop of '71, we can safely say that as soon as the tax question is definitely settled planters will realize a good price for all grades of manufacturing leaf.

rounding markets that has been established for the past ten or twenty years, the extraordinary exertions to maintain the same by heavy money advances to the planter, the purchasing of a few crops in different localities at very high figures to induce others to ship to the markets where these purchases were made for, would seem to a causual observer to have a tendency to break down a new market. This, fitted up in splendid style, and a room set market is increasing in quantity, quality and importance. We have not found it necessary to advance a dollar on the present crop, to secure the selling of it. We have worked and are still working for the interest of the planter.
